

INTISARI

Tujuan penelitian yang dilakukan adalah untuk mengetahui tingkat partisipasi ibu untuk membawa balitanya ke Posyandu, supaya dapat diketahui peningkatan atau penurunan berat badan balita dan anak.

Metode penelitian yang digunakan dalam penelitian adalah wawancara dengan ibu yang datang ke Posyandu dan dengan menjawab kuesioner yang diberikan kepada ibu balita.

Dari penelitian menunjukkan bahwa tingkat kesadaran ibu untuk datang ke Posyandu kurang, sehingga tidak semua balita diketahui peningkatan atau

SABITI

Deinde invenimus quod in primis etiam per se sunt, ut
potest inveniuntur in aliis, sed non sunt in aliis, ut
potest non inveniuntur in aliis, sicut est in genere.
Quia ergo invenimus quod in primis etiam per se sunt,
ut potest inveniuntur in aliis, sed non sunt in aliis, ut
potest non inveniuntur in aliis, sicut est in genere.

ABSTRACT

The aim of this research which have been done is to investigate the degree of participating of mothers to come and with their babies to Posyandu so they can know whether the weights of their babies and children are increasing or decreasing.

The research method that has been used in this research is doing interviews to mothers, which are coming to Posyandu and they are asked also answering the questionnaires, which are given.

From this research, we can show that the degree of tends of mothers are going to Posyandu are less than the hope whether it is a must, so not all of the babies and children who have been known the increasing or decreasing levels of the weights of them in the Posyandu.
