

## **ABSTRACT**

*Warung Bebek Ampel Abah Munir had difficulties to organize their business, because of the way they record their report still use manually way by stationery, calculator, and book as recording media so it takes a relatively long time to set up business processes that exist there. Warung Bebek Ampel Abah Munir require a device to improve its management system, so the author designed a device based desktop application that has an important role so the owner can obtain valid and accurate information. That informations can be used to view remaining ingredients report, the rest of the menu report, and the purchase and sale report. In developing the system the author uses the waterfall method. Based on the test result, the system can perform all of the features offered.*

*Keyword: inventory application, material data, employee data, Supplier data, Menu Report, Sales Report, Purchasing report*
