Acknowledgement

Praise be to Allah SWT, the Almighty God of nature for His guidance and help so far so that this research can be completed as planned. Salawat and taslim may always be poured out on the lord of the Great Prophet Muhammad SAW, the Messenger who brought the message of Islam and good news which saved humans from the realm of darkness and ignorance to the realm full of light and knowledge.

I am fully aware that this research would not have been presented well in the form of a final assignment like this without the study opportunities, guidance, upbringing and love that the researcher received while studying at the English Language Education Study Program, Faculty of Language Education, Yogyakarta Muhammadiyah University. For this reason, researchers should express their highest thanks to those who have contributed so far, as follows:

1. Chancellor of Yogyakarta Muhammadiyah University (UMY), Dr. Ir Gunawan Budiyanto, M.P who has accepted and given researchers the opportunity to study at UMY.
2. Dean and deputy deans of the Faculty of Language Education, UMY, Mrs. Eko Purwanti, S. Pd., M. Hum., Ph. D. who has facilitated and served researchers during their studies so that all academic and other activities can run well.
3. Head of the English Language Education Study Program, Mr. Andi Wirantaka, S.Pd., M.Hum for all the very constructive guidance and motivation to researchers during their education so that all academic programs both on and off campus can be followed according to activities programmed.
4. Supervising Lecturer Mrs. Sri Rejeki Murtiningsih, Ph.D for all the guidance and instructions which were very useful academically for

researchers from the beginning of determining the title until the completion of this final assignment.

5. Lecturers and employees of the Faculty of Engineering, especially in the UMY English Language Education Study Program, who sincerely educate, teach and serve researchers in pursuing their unforgettable studies. Fellow contemporaries and classmates who always open up space for dialogue and discussion which is sometimes tense but flows with a full sense of togetherness and kinship.

Above all these people who have contributed, there are two important figures who are unforgettable, they are my professors who not only taught researchers about the importance of science but more than that have guided and laid the foundation for meaningful education for a life full of boundless love. . Their sacrifices with tears and soft voices full of hope during prayer have led researchers to now and in the future. They are the fathers and mothers, Drs. H. Muhammad Kasim and Dra. Hj Partiah. Thank you, father and mother, my prayers always accompany my prayers.

All the family and close friends of researchers who have also helped include the family (Pakde Jamroh, Pakde Muslim, Budhe Sutranik. Budhe Atisah, Mba Elva, Mas Dhimas, Mba Meta, Mba Meti, Ica), my friends in arms (Uut, Diany, Vina , Shelsa, Arina), IGOV UMY Staff (Kak Folta, Rofi, Nana, Amel, Siska, and Fawwaz). All the kindness, support, prayers and motivation given to researchers will not be forgotten.

Hopefully this final assignment will be a work that will provide benefits, both to researchers and future generations in efforts to develop science and technology as well as policies to improve the quality of education in Indonesia.
