DEDICATION

I dedicate this thesis to the love of my life, my father, my mother, myself, and those who always ask:

"When will your thesis be finished?"

Graduating late or not graduating on time is not a crime, nor is it a shame. What a dwarf it would be to measure a person's intelligence only by who passed the fastest. Isn't it best to have a completed thesis?

Because maybe there is something behind their late graduation, and believe me, my reason here is completely good
