## DEDICATION PAGE

With the Grace and Blessings of Allah SWT who has allowed me to successfully complete the final project in the form of this thesis report, there is no word more appropriate than the word of gratitude for everything. To family, relatives, friends, it is also appropriate for the author to thank you for your support and assistance that is very meaningful in completing this thesis report.

I began compiling this thesis report in the middle of 2023 until it was finally completed in the middle of early 2024. This final project is a clear proof of my struggle in carrying out my responsibilities as a child, a student, and a friend to the loved ones around me.

Any kind of process towards a higher level than the present will never be easy, when we want to improve ourselves then we must also be able to increase our efforts and struggles in order to achieve these goals. "If fear gets the best of us, then it will be harder and harder for us to succeed in doing what we fear."

I will not forget to express my gratitude and thanks to:

1. I would like to express my deepest gratitude to Allah SWT for giving me the strength and ability to complete this thesis report. If not with Allah's intervention, I do not know when I can complete this final project. Alhamdulillah
2. My main tribute will be given to my parents, **Dwikoraharjo** and **Endah Rachmawati** as the two people with the greatest influence in my life process since birth. I will never end my gratitude to these two wingless angels for successfully educating me as a boy to be able to walk on my own feet, successfully educating me to become a boy who does not give up easily with all the problems I face, and my parents have also succeeded in educating me to become someone great like this. All the advantages and achievements that I have achieved cannot be separated from the role of my parents, including the completion of this thesis report cannot be separated from the prayers of my parents who are very great. However, all mistakes, errors, and shortcomings that I have are from myself and not caused by my parents because they have taught me so much about the meaning and process of life as it should be. I am very grateful that my parents can witness my graduation process later, and I continue to pray for the future so that my parents can be given longevity and ease in their lives so that they can watch me achieve success later. Lastly, I am very grateful and proud

to have parents like my father and mother because I know they are very great parents in educating their children.

3. I also dedicate this thesis to all my colleagues who always patronize me when I am in the process of completing this thesis. I was very happy when a colleague said "So people really have no zest for life, when will you finish your thesis then!". Because with these words, I became more motivated to immediately complete my final project so that in the end I could finish my final project earlier than the person who underestimated me. The process of becoming more is not about who finishes first, but about how we absorb all the processes we face to finally become a better person in the future.

4. I do not forget to dedicate this thesis to the greatest human being after my parents and my siblings, namely myself Muhammad Akbar Derry Ramadhan for successfully fighting fear, laziness, and also successfully fighting temptation after temptation not to do the final project. Congratulations to myself for achieving my target to be able to show a little achievement to my parents, with the completion of my thesis report, I feel that I have succeeded in making my parents proud even though only in a simple way.

5. I dedicate this thesis to my best friend Jovito Ardeny Ganim who continues to motivate me to complete my target. Jovito is also a non-blood brother who always accompanies me whenever I need it. My only friend who never gets tired of giving me advice and encouragement to keep moving against everything that exists. Thank you Jovito.
