

ABSTRACT

This research was conducted to examine the influence of profitability, liquidity, leverage, growth and size of the dividend policy on companies LQ 45 listed in the Indonesia Stock Exchange (IDX). Problems of this study are due of the contradiction between the theory with facts about the influence of profitability, liquidity, leverage, growth and size of the dividend policy. Sampling of this study using methods purposive sampling, a sample of 17 companies that accordance with the criteria that have been determined by the long study period 2007-2011.

From the analysis show partial result of the variable profitability partially positive and significant influence on dividend policy, Growth variables and significant negative effect on dividend policy, but variable liquidity, leverage and size negative and significant influence and simultaneously to the five variables that affect the dividend policy.
