

## **ABSTRACT**

*This research is to analyze the factors that influence the work performance of district/city government in Indonesia during the period of 2011-2012. This research used secondary data from data gathered by data gathering council and was published to society. The method used was double linier regression model.*

*Based on the analysis that has been done, the result shows that the size of the government, the size of the area, the size of the legislative power, and audit finding have significant influence towards the working performance of district/city government, while the index of human development has no significant influence towards the working performance of district/city government.*

**Keyword:** *Size of the government, Size of Area, Size of Government, Size of Legislative, capital expenditures, and audit findings of BPK.*
