

INTISARI

Objective Structured Clinical Examination (OSCE) adalah salah satu ujian yang harus dihadapi oleh mahasiswa kedokteran, dimana didalam OSCE skill mahasiswa di ujikan. Hasil ujian ini dipengaruhi berbagai faktor salah satunya inteligensi, ada 3 inteligensi yaitu spiritual inteligensi, emosional inteligensi dan intelektual inteligensi Zohar dan Marshall (2000) telah sepakat menempatkan kecerdasan spiritual sebagai kecerdasan yang tertinggi diatas kecerdasan emosional dan kecerdasan intelektual. Pada penelitian ini bertujuan untuk mengetahui apakah ada hubungan antara Kecerdasan Spiritual dengan nilai OSCE Mahasiswa Program Studi Pendidikan Dokter Fakultas Kedokteran dan Ilmu Kesehatan Universitas Muhammadiyah Yogyakarta.

Penelitian ini menggunakan desain penelitian observasional analitik dengan pendekatan *cross-sectional*. Populasi dalam penelitian ini terdiri dari empat angkatan(2012, 2013, 2014 dan 2015) Mahasiswa Program Studi Pendidikan Dokter Fakultas Kedokteran dan Ilmu Kesehatan Universitas Muhammadiyah Yogyakarta berjumlah 88 sampel. Kecerdasan spiritual diukur dengan menggunakan kuisisioner SISRI 24, berisi 24 poin pertanyaan.

Hasil uji korelasi menunjukkan adanya hubungan positif yang sangat signifikan antara kecerdasan spiritual dengan nilai OSCE ($r = +0,630$, $p = 0,000$, $p < 0,01$). Semakin tinggi kecerdasan spiritual mahasiswa, semakin tinggi nilai OSCE.

Kata Kunci : Kecerdasan Spiritual, *Objective Structured Clinical Examination* (OSCE).

ABSTRACT

Background : *Objective Structured Clinical Examination (OSCE) is one of the tests that must be faced by medical students, where in OSCE student skills to exam. The results of this exam is influenced by many factors one of which is intelligence, there are three intelligence that is spiritual intelligence, emotional intelligence and intellectual intelligence Zohar and Marshall (2002) have agreed to put spiritual intelligence as the highest intellect on emotional intelligence and intellect. In this studi aims to determine whether there is a relationship between Spiritual Intelligence with OSCE values Students Studi Program Medical Education Faculty of Medicine and Health Sciences, University of Muhammadiyah Yogyakarta.*

Methods: *The design of this study was observational analytic study with crosssectional. The population in this study is a medical student in Muhammadiyah University of Yogyakarta.in 2012, 2013, 2014 and 2015 with a sample of 88 students. Spritiual intelligence was measured using a SISRI 24 with the total number of questions 24 items.*

Result: *Correlation test results showed a significant positive correlation between spiritual intelligence with OSCE values ($r = +0.630$, $p = 0.000$, $p < 0.01$). Student with higher spiritualintelligence score, the result of OSCE also higher.*

Keyword : *Spiritual Intelligence, Objective Structured Clinical Examination*
