Magister Manajemen Rumah Sakit, Universitas Muhammadiyah Yogyakarta

Latar Belakang: Rumah Sakit PKU Muhammadiyah Temanggung melaksanakan perencanaan yang tepat dan manajemen obat yang baik untuk menjamin pasien mendapatkan obat yang bermutu. Manajemen obat yang baik dapat terpenuhi melalui empat tahap yaitu 1) *selection*, 2) *procurement*, 3) *distribution*, dan 4) *use*, serta faktor-faktor yang dapat mendukung antara lain komitmen pelaku serta fasilitas yang memadai.

Tujuan penelitian: Untuk mengetahui faktor-faktor yang mendukung keberhasilan penyediaan obat meliputi faktor pelaku, fasilitas, dan manajemen obat di Unit Farmasi Rumah Sakit pada tahap *selection*, *procurement*, *distribution* dan *use*.

Metode: Penelitian ini dilakukan di Unit Farmasi RS PKU Muhammadiyah Temanggung menggunakan rancangan deskriptif dan pengambilan data secara retrospektif dan prospektif. Analisis menggunakan data kualitatif dan kuantitatif.

Hasil: Hasil penelitian menunjukkan pada tahap *selection* masih ada obat yang tidak sesuai formularium. Tahap *procurement* masih belum 100% sesuai. Tahap *distribution*, masih ada obat yang belum sesuai dengan kartu stok. Tahap *use* masih belum efektif dan efisien. Aspek fasilitas cukup terpenuhi dan aspek pelaku belum efektif.

Kesimpulan: Tahap *selection*, *procurement*, *distribution*, dan *use* belum efektif dan efisien, serta aspek fasilitas dan pelaku masih belum maksimal.

Kata Kunci: faktor keberhasilan, manajemen obat.

ABSTRACT

ANALYSIS OF SUCCESS FACTORS DRUG MANAGEMENT IN HOSPITAL PHARMACY UNIT AT PKU MUHAMMADIYAH TEMANGGUNG
